

Math for Living / Matemáticas para la Vida

Ten stand-alone lessons in English and Spanish are designed to improve financial literacy and life skills with examples, practice problems, and vocabulary relating to work, smart shopping, and budgets, as well as information on obtaining the resources for college. Originally created for use in the MASTERS (Mathematics Achievement and Success Through Engagement in Resources for Migrant Students) Consortium Incentive Grant project, the lessons are non-sequential and written at a middle school reading level. Activities reinforce basic math skills while teaching practical concepts that apply to both everyday life and successful careers.

Lesson Titles

- Income and Expenses / Ingresos y Gastos
- Creating and Using a Budget * / Creación y Utilización de un Presupuesto *
- Advertisements and Specials / Anuncios Publicitarios y Especiales
- Comparing Prices and Finding the Best Buy / Comparación de Precios y Elección de la Mejor Compra
